DATA PREDICTION & ITS BENEFITS

Training Duration:
1 day

Course Details

Objective
This is an introductory training to the importance and application of data prediction in our daily work, be it marketing, promotion, sales, bidding and project execution.

Who should attend
This module is developed for all, including staffs and heads of departments and organisations that are interested in data prediction.

Course Background

◆ In this IR4.0 era, public and private organisations that possess and able to effectively use their data will have the extra edge if compared to the competitors.

◆ Various methods and software will be introduced in this theory session for your industry application.
